## Engineers to study Fields Ertel traffic

THE ENQUIRER

Traffic problems along Fields Ertel Road near the interchange with Interstate 71 are about to get a closer look from engineers.

During the next few months, study crews from KZF Design will be working along Fields Ertel Road between Reed Hartman Highway and Wilkens Boulevard to document traffic flow, sight-distance restrictions and other hazards.

Preliminary recommendations on how to improve the road are expected in January.

More information can be found at [www.fieldsertel.com](http://www.fieldsertel.com); or by calling Jon Wiley, project design consultant, 513-621-6211; or Tim Gilday at the Hamilton County Engineer's Office at 513-946-8914.
