Review Fields Ertel data at meeting

The first public meeting associated with a study of the Fields Ertel Road corridor will be conducted from 4-7 p.m. Wednesday, Sept. 26, at the Symmes Township Safety Center, 8871 Weekly Lane.

The study encompasses Fields Ertel between Reed Hartmann Highway and Wilkens Boulevard in Deerfield Township.

No presentations will be made at the meeting.

Instead, residents will be able to review analyses of traffic flow, safety conditions and existing features of the corridor and offer their input.

Studies, findings and existing plans of the study area will be available at the meeting, which is in an open-house format.

No formal presentations will be made.

Residents, local business community members, motorists and government representatives are encouraged to attend.

For details and exhibits on the project, visit www.fieldsertel.com.

For more information, call KZF senior civil engineer Jonathan Wiley at 621-6211.
